*Our patent pending device, **Pacemaker®**, is the world's first pocket-size DJ system – a superior portable music player enabling the playing of two tracks simultaneously, equipped with an extensive range of professional audio manipulation features allowing for creative mixing between two independent channels.*

Any mix created can be saved for legal sharing.

MOVING AHEAD

We're committed to creating an inviting music platform of the highest quality while pioneering industry standards of innovation, openness and accessibility.

The Pacemaker concept includes a pallet of products, accessories and services supporting our greater ambition – that anyone can let everyone share their music personality!

Our concept is designed to provide the best source for inspiration; to make discovering and acquiring new music easy, and to reward music lovers for sharing their favourite music.

We offer direct access to and partaking in the dynamic market of music taste sharing by supplying the facilitating tools for creative expression, self-exposure and shared experience.

We aim to increase the diversity and reinforce the value of music by offering new means for people like us to increase inspiration, reach and precision in the music selection process, and to creatively engage in what they love!

We're out to try something different; to bring people closer to the music they love, to let music lovers be creative with their passion, to make themselves available and heard, and to have a good time in the process!
